• Storing a new password • Displaying all stored passwords • Searching all passwords • Copying passwords • Show password characters • Removing passwords • Setting a master password PassLook is a small software application designed specifically for helping you store passwords for your online accounts and protect the sensitive information with the aid of master password. The advantages of being portable Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to save passwords on the breeze, without having to go through installation steps. Minimalistic looks You are welcomed by a clean feature lineup that embeds only a few dedicated parameters to tinker with. Everything is kept as simple and clear as possible, so even less experienced users can easily discover and tweak the program's functions. Storing a new password PassLook gives you the possibility to add a new password by providing details about the website, user name, password, user-defined notes, as well as the URL that needs to be launched. What's more, you are allowed to perform search operations, edit or delete the current entry, show or hide the characters of the password between asterisks, and copy the password to the clipboard, so you can paste it into other third-party tools. Other notable characteristics worth being mentioned offer you the possibility to reveal all passwords in a list, copy all passwords to the clipboard in an alphabetical order, use hotkeys for a better control over the entire process, as well as set up a master password from preventing unauthorized users from stealing sensitive data. Bottom line All in all, PassLook offers a simple software solution when it comes to helping you store passwords for your online accounts in a password-protected database.
